

A lot of new cars are now 'keyless' but this doesn't mean they are immune from thieves - all it takes is one mistake. Keep your car safe, sound and secure this autumn:

- Have the lights flashed, or the wing mirrors retracted?
- Make sure you're confident that your car is secure before you walk away.
- Never leave car keys within view or reach of the front door.
- Faraday bags are useful for blocking the signal between your ignition key and your car.
- Use a steering wheel lock
- Hide any electrical items out of sight or out of your vehicle altogether.

If you are a victim of a theft, please report this to us straightaway on **101** or via our website www.surrey.police.uk.
